To whom it may concern.

I [REDACTED] strongly oppose the proposed waste Disosal Facility in Ipswich street.

As I travel 110kms to and from my work place on Wiluna street daily I am seriously concerned about the impact this will have to my safety and the extra travel time needed due to the increased traffic.

I'm concerned about not only my exposure but also the rest of the public who travel through this area exposure to the waste, smell and the noise and the litter.

I feel that this would servealy impact the business I work for affecting the customers who use us driving them away which could lead to putting not only my job but also the jobs of others at risk. Which would but a strange on the welfare system. Business owners in this area losing there business due to loss of customers

I worry about the environmental impact and the quality of the air that we would be breathing in which will have and serious effects on our healt and in time putting extra strange on the already stretched health services.

While I believe this facility is nessacary I believe this would be better located in an industrial area rather than the retail area.

I strongly oppose this a ask that this is rejected in full.

Thankyou for hearing my objection.
