Subject: Submission of Objection to CRSMaterialsEIS201700053 Fyshwick

Categories: Green Category

In response to the proposed materials facility at Ipswich Street Fyshwick EIS #201700053 I wish to register my objection to siting of this facility at the proposed location.

Fyshwick is already a congested place and has many business operations which I believe would be adversely affected - and some extremely so - by placement of a facility of this kind at this location.

In addition, I believe that the increased traffic movements of heavy vehicles involved in transfers would inevitably decrease air quality from vehicle engine exhaust, especially in and around Ipswich Street Fyshwick and approaching access roadways..

I believe that a more appropriate remote site should be selected if the proposed materials recovery and waste transfer terminal is to be permitted to proceed in Canberra.
