Draft Environmental Impact Statement, Materials Recovery Facility Fyshwick, Section 8, Blocks 9 & 11  
Capital Recycling Solutions  
Application Number 201700053

Two Whom it May Concern

I strongly oppose the materials recovery facility being located in Fyshwick.

Fyshwick is a place in which I work, entertain friends, shop and gain access to vital services that I cannot get in one place in Canberra.

Fyshwick has continually evolved over the years to become a place beyond simply an industrial area. It has become a melting pot of creative small businesses, retail opportunities and cafes.

If this proposal was to go ahead it will change the vibrant culture of Fyshwick and have a lasting negative impact on the area. The increase in traffic and noise as a result of the over 200 trucks and the addition of waste and subjoined vermin will force many retailers, cafes and small businesses to move or dramatically change their practice at significant cost. These issues I don't believe have been adequately addressed.

Regards
