

Annual Compliance Report

Residential development, Block 9 Section 64, Watson, and extension of Negus Crescent (EPBC 2012/6418)

01 July 2021 – 30 June 2022

August 2022

**Prepared by the Environment, Planning and Sustainable Development Directorate, on
behalf of the ACT Government**

This report demonstrates how the Suburban Land Agency (previously known as the Land Development Agency; the proponent), Deed Management and the ACT Parks and Conservation Service (PCS), all within the Environment, Planning and Sustainable Development Directorate (EPSDD), and Lonsdale 28 Pty Ltd have complied with the conditions in the approval decision for the development of the Residential development, Block 9 Section 64, Watson, and extension of Negus Crescent (EPBC 2012/6418). This covers the 2021-2022 reporting period from 01 July 2021 until 30 June 2022.

Specifically:

- The Deed Management section in EPSDD are responsible for complying with condition 1 in the approval decision
- Lonsdale 28 Pty Ltd are responsible for complying with conditions 2 and 4 in the approval decision
- PCS is responsible for complying with condition 3 in the approval decision, and
- All parties are jointly responsible for complying with conditions 5, 6, 7 and 8 in the approval condition.

In addition, this report also demonstrates how PCS has implemented the management plan for the Justice Robert Hope Park offset area on behalf of the Suburban Land Agency.

Declaration of Accuracy

In making this declaration, I am aware that sections 490 and 491 of the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) make it an offence in certain circumstances to knowingly provide false or misleading information or documents. The offence is punishable on conviction by imprisonment or a fine, or both. I declare that all the information and documentation supporting this compliance report is true and correct in every particular. I am authorised to bind the approval holder to this declaration and that I have no knowledge of that authorisation being revoked at the time of making this declaration.

| | development site within seven days of each document's approval by the ACT Government. | | | |
| 3 | <p>To compensate for the loss of Box–Gum grassy Woodland at the development site, and for the better protection of listed threatened species and communities and listed migratory species, the approval holder must develop a Justice Robert Hope Park Environmental Management Plan (JRHPEMP) for the conservation and management of the Justice Robert Hope Park for the duration the impact occurs at the development site. The JRHPEMP must be submitted to the minister for approval within six months of substantial commencement at the development site. The JRHPEMP must include:</p> <ul style="list-style-type: none"> a. Details of an appropriate monitoring program to be undertaken by a suitably qualified expert, to monitor the condition of Box–Gum Grassy Woodland in Justice Robert Hope Park, including undertaking baseline surveys of condition at the date of this approval b. Measures to maintain the condition of Justice Robert Hope Park at a standard equivalent to or better than its condition at the date of this approval (as defined in the referral documentation and condition 3a), by such means as are necessary, including but not limited to: <ul style="list-style-type: none"> i. planting or seeding of native forbs and grasses consistent with | Parks and Conservation Service | Compliant | <p>The draft Justice Robert Hope Park (JRHP) Offset Management Plan was due for submission to the Department of Environment and Energy on 29 February 2017 and was submitted on 28 February 2017.</p> <p>The final Justice Robert Hope Park Offset Management Plan, approved by PCS on 13 November 2018, was submitted to the Department on 14 November 2018. The Department approved the plan on 30th November 2018. The final plan was published on the ACT Government's Offsets Register in January 2019.</p> <p>Details of 3. a. through 3.e. are compliant, and details have been included in the JRHP offset management plan.</p> <p><i>Condition 3.c. was revoked on 6 March 2017</i></p> |

| Condition Number | Condition | Responsibility | Compliant / Non-compliant / Not applicable | Description |
|------------------|---|---|--|---|
| | <ul style="list-style-type: none"> ii. the definition of EPBC Act listed Box-Gum grassy Woodland weed management to meet statutory obligations iii. planting of trees consistent with the definition of EPBC Act listed Box-Gum Grassy Woodland iv. control of feral and domestic animals, and v. Control of unauthorised access, waste and pollution. <p>c. <i>This condition has been revoked as per the approved variation by the Department of Environment and Energy on 06/03/2017.</i></p> <p>d. Consultation with local park-care groups and relevant parties over the proposed implications of management outlined in the JRHOMP</p> <p>e. Details of administration of funding arrangements with the relevant parties who will be responsible for managing Justice Robert Hope Park including a schedule of anticipated costs.</p> | | | |
| 4 | Within 20 days of substantial commencement of construction, the approval holder must advise the Department in writing of the actual date of commencement. | Lonsdale Pty Ltd 28 | Non-compliant (Rectified) | The Department of Environment and Energy was formally notified of the date of substantial commencement on 29 November 2016. The actual date of substantial commencement was 29 August 2016. |
| 5 | The approval holder must maintain accurate records substantiating all activities associated with or relevant to the conditions of approval, and | Suburban Land Agency, Deed Management and | Compliant | Files are held by all parties responsible for compliance with the approval decision. |

| Condition Number | Condition | Responsibility | Compliant / Non-compliant / Not applicable | Description |
|------------------|--|---|--|---|
| | make them available upon request to the Department. Such records may be subject to audit by the Department or an independent auditor in accordance with section 458 of the EPBC Act, or used to verify compliance with the conditions of approval. Summaries of audits will be posted on the Department's website. The results of audits may also be publicised through the general media. | Parks and Conservation Service (within EPSDD) and Lonsdale 28 Pty Ltd | | |
| 6 | By 30 August of each year after substantial commencement of the action, the approval holder must publish a report on their website addressing compliance with each of the conditions in this approval, including implementation of any management plans as specified in the conditions. Documentary evidence providing proof of the date of publication and non-compliance with any of the conditions of this approval must be provided to the Department at the same time as the compliance report is published. Non-compliance with any of the conditions of this approval must be reported to the Department within 10 business days of their identification. | Suburban Land Agency, Deed Management and Parks and Conservation Service (within EPSDD) and Lonsdale 28 Pty Ltd | Compliant | This is the sixth report required for this development and associated offset and fulfils condition 6 of the approval decision. Previous Reports 2020-21 report : published 09 September (non-compliant; rectified) 2019-20 report : published 29 Sep 2020 (non-compliant (rectified)) 2018-19 report : published 29 Aug 2019 (compliant) 2017-18 report : published 28 Nov 2018 (compliant) 2016-17 report : published 28 Nov 2017 (compliant) |
| 7 | Upon the direction of the Minister, the approval holder must, at its expense, ensure that an independent audit of compliance with the conditions of approval is conducted and a report submitted to the Minister. The independent auditor must be approved by the Minister prior to the commencement of the audit. Audit criteria must be agreed to by the Minister and the audit | Suburban Land Agency, Deed Management and Parks and Conservation Service (within EPSDD) and | Not applicable | No audit was requested. |

| Condition Number | Condition | Responsibility | Compliant / Non-compliant / Not applicable | Description |
|------------------|--|---|--|--------------------------------|
| | report must address the criteria to the satisfaction of the Minister. | Lonsdale 28 Pty Ltd | | |
| 8 | If, at any time after five years from the date of this approval, the approval holder has not substantially commenced the action, then the approval holder must not substantially commence the action without the written approval of the Minister. | Suburban Land Agency, and Lonsdale 28 Pty Ltd | Not applicable | The action has been commenced. |

3. Implementation of the Offset Management Plan

The following table describes how the ACT Parks and Conservation Service (Environment, Planning and Sustainable Development Directorate) has undertaken the management actions described within the [Justice Robert Hope Park Offset Management Plan](#) for the 2021 – 2022 reporting season on behalf of the Suburban Land Agency (the proponent).

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|--|---|--|--|
| Activities Declaration | Prepare an Activities Declaration for the Justice Robert Hope Park (JRHP) Nature Reserve pursuant to the ACT Nature Conservation Act 2014. | 2018-19 | As part of the PCS signage upgrade project, activity declaration signs have been erected at each main gate into the offset area. A review of all Activity Declarations is being undertaken to align these more fully to the Nature Conservation Act 2014 and current signage across reserve. This review will take some time. JRHP is on the list for review. |
| Consult with ACT Heritage Unit | Inform the ACT Heritage Unit of operational or habitat restoration works which could impact potential cultural heritage sites within the offset sites. | On-going | There are no known heritage sites listed within the reserve. Should any potential sites be located they will be reported through the correct avenues and appropriate actions for conservation of such sites will be added to the Offset Management Plan (OMP) as part of the first OMP review. |
| Cultural heritage assessment reporting and management requirements | <ul style="list-style-type: none"> Follow the guidelines outlined in the Cultural Heritage Reporting Policy (ACT Heritage Council 2015). This document details the cultural assessment and reporting requirements for projects that may impact on places or objects with indigenous or historic heritage value. Any discovery of an Aboriginal place or object will | On-going | No new sites have been discovered thus far. |

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|-------------------------------|--|--|---|
| | be reported to the Heritage Council within five working days. | | |
| Utility notifications | <ul style="list-style-type: none"> Follow the procedures required when planning works within the vicinity of utility infrastructure. Adhere to the Code of Practice between PCS and ActewAGL (ERM 2009). | On-going | No works were conducted during this reporting period. Guidelines and codes of practice are followed. |
| Offset Management Plan review | This OMP will be reviewed and updated within six (6) months of the submission to the ACT Government of consultant reports prepared as part of the 2020 Box–Gum Woodland monitoring program (Section 5.1). The reviewed plan will be submitted to the Commonwealth Department of the Environment for approval. Until the revised plan is approved, the offset site will be managed in accordance with the [current] Plan. | Six months from completion of 2020 BGW monitoring report | This plan is due for review. OMP process is likely to commence during early 2023. Submission of draft Justice Robert Hope Park OMP to the Department is estimated by mid-2023. |
| Fencing | <ul style="list-style-type: none"> Replace offset boundary fences and gates. Remove internal fencing. New fences to be installed using wildlife friendly specifications including kangaroo access gates. | 2018–19 (completed 2017) | Fences have been maintained. |
| Tracks and trails | <ul style="list-style-type: none"> Construct new formed visitor discovery trail with track markers. Establish and maintain slashed management tracks | 2019–20; On-going. | Tracks have been continuously maintained. The new visitor trail was deemed unnecessary and would negatively impact woodland values. Instead, existing trails were improved and enhanced. |

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|------------------|--|--|--|
| Reserve signage | Install large reserve signage and small “Dogs on leash” signs. | 2018–19 (complete 2019) | Signage was maintained as appropriate. This signage was installed in 2019 as a part of the PCS signage upgrade project and included activities declaration information. |
| Reserve signage | Replace existing interpretation signs. | 2019–20 (complete 2019) | The reserve signage installed in 2019 includes interpretation information. |
| Waste | Waste will be removed from the offset site including old fencing materials and general litter as required. | On- going | On-going as required. |
| Weed control | <ul style="list-style-type: none"> • Target key weeds that are of a statutory obligation for control: <ul style="list-style-type: none"> – African Lovegrass – Woody weeds – Chilean Needlegrass – Paterson’s Curse – Scotch Thistle – Serrated Tussock – St John’s Wort • Spot spraying is the preferred method of control in conjunction with slashing in areas of dense weed infestations. • All weed control efforts to be mapped and reviewed annually to monitor effectiveness of weed control program. | Annually | <ul style="list-style-type: none"> • Weed control has continued as required – undertaken by suitably qualified contractors. Additional weed control is also undertaken by the Watson Woodlands Working Group (WWWG) volunteers. <ul style="list-style-type: none"> ○ In 2021-22 weed control undertaken in the offset area included: serrated tussock, African Lovegrass, St. John’s Wort, Broadleaf, and Chilean Needlegrass. • A Phalaris control trial established in autumn 2017 is ongoing. The aim of the trial is to expand on small-scale trials, previously done by the WWWG, which sprayed out small areas (a few square metres at a time) of introduced grasses and re-seeded them with kangaroo grass. It is hoped to determine whether this method is applicable to broader scale rehabilitation of old Phalaris stands back to native pasture. |
| Invasive animals | <ul style="list-style-type: none"> • Control rabbits in line with ACT Pest Management Strategy. • Coordinate the above activities with those in the Mount Majura Nature Reserve if practicable. | Annually | <ul style="list-style-type: none"> • Rabbits were monitored in Spring and Autumn. • Additional population monitoring for rabbits, foxes and cats was conducted through camera trapping • Rabbit numbers remain stable and under threshold for undertaking large control programs. |

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|-------------------------|--|--|---|
| Revegetation | <ul style="list-style-type: none"> • Native grass seed to be used for revegetation as appropriate • Shrubs characteristic of Box Gum Woodland communities are to be planted to the higher benchmark within the offset site to improve bird habitat. • Revegetate around the storm water settling pond with aquatic plants to maintain frog habitat. • Temporary fencing or guards to be erected around revegetation to protect from grazing. | <p>2016–17 (completed)</p> <p>2018–19 (completed)</p> | <ul style="list-style-type: none"> • Plantings were maintained • Direct seeding was conducted for restoration of Phalaris area in previous years – these trial plots were maintained and have been expanded in 21-22. • Native seed collection was conducted for restoration projects in previous years – in 2021-22 40 kg of Kangaroo grass was sourced for 2023 seeding restoration plots. • Kangaroo exclusion fencing to support and expand successful groundcover restoration plots is continuing. • 700 tube stock (400 shrubs and 300 forbs) were planted in winter 2017. Species were selected in consultation with the local volunteer group WWVG based on the EPBC Act list of species that are known to make up White Box-Yellow Box-Blakely’s Red Gum Grassy Woodland and Derived Native Grassland, as well as consideration of potential food species for the regent honeyeater and superb parrot. These plantings are subject to a two-year maintenance program with four maintenance checks each year to ensure an overall survival rate of 80%. This target is currently being met. Maintenance activities include watering and the replacement of fibre mulch mats, tree guards and stakes, and the purchase of tube stock and revegetation equipment. In 21-22, the WWVG indicated they were happy with the quantity and quality of the shrubs and see potential for future thinning. The focus will likely move to grasses and forbs in future. |
| Woody debris relocation | If available, woody debris will be sourced from the Development site and placed appropriately in consultation with the WWVG | 2016-17 (completed) | <p>Trees felled (as per multi-unit site DA 201732196 approved on 14 December 2017) were utilised to create frog habitat in the two dams in the reserve. This was a part of a larger dam restoration project completed in 2019. Two woody debris logs were sculpted into bench seats.</p> <p>No 2021-22 update.</p> |

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|---|--|--|---|
| Increasing habitat for hollow nesting animals | Investigate options to increase the nesting habitat for birds and arboreal mammals. | 2018–19 | Conducted as appropriate. Feed trees were identified and a plan for increasing feed availability for Superb Parrot was written. |
| Water quality and frog habitat | <ul style="list-style-type: none"> Water quality testing will be completed monthly using Waterwatch guidelines. Frog populations within the offset site will be monitored annually in accordance with the Frogwatch Census method. | Annually | <ul style="list-style-type: none"> Water quality testing is conducted regularly (monthly) by one of the WWVG volunteers and data is submitted to ACT Waterwatch and is uploaded to the Atlas for Living Australia. Frog Watch activities are planned for future years. |
| Box–Gum Woodlands mapping | Engage a suitably qualified expert to map the extent and condition of Box–Gum Woodland within the reserve. | 2017 (complete), 2027 and 2033 | Mapping of condition classes within the Box–Gum Woodland community was undertaken in 2016-2017 by a suitably qualified consultant. The report is published on the PCS offsets website . |
| Box–Gum Woodlands monitoring | <ul style="list-style-type: none"> Engage a suitably qualified expert to undertake monitoring of existing plots within the Box–Gum Grassy Woodlands community (as described in Table 9). PCS ecologists to review monitoring data to identify any changes occurring over time within the Box–Gum Woodland community. | 2017 (complete), 2018 (complete), 2019 (complete), 2020 (complete), 2023, 2026, 2029 and 2032. | <ul style="list-style-type: none"> Existing plots were monitored in 2018, 2019 and 2020 for BGW condition. BGW monitoring will be undertaken again in 2023. An analysis of monitoring data is currently being undertaken to produce baseline values for this site, in order to track trends and whether the site is maintaining or improving in ecological condition. Floristic and understorey structure monitoring was undertaken by offsets in-house ecologists in 2018,2019 and 2020. Structure was again monitored in Spring 2021. Understorey structure and weed monitoring will continue annually at the site to inform grazing, fire and other management programs. |
| Hoary Sunray monitoring | PCS staff to establish baseline data and undertake monitoring of the Hoary Sunray population. PCS staff will map the extent of Hoary Sunray populations within the offset site at each monitoring event to ensure change over time in extent of the population can be assessed. | 2017 (complete), 2020 (completed in 2021), 2023, 2026, 2029 and 2032. | <ul style="list-style-type: none"> Baseline data for the Hoary Sunray populations was collected by PCS staff in October 2017 and March 2021. 2020 surveys were delayed due to COVID19 lockdowns. Hoary Sunray population monitoring is planned for collection in the next reporting period. 2017 Methods: The boundaries of each of three patches of Hoary Sunrays were mapped, and counts undertaken by randomly placing 1m² quadrats throughout each patch to gain a representative average count. |

| Activity | Description (from OMP) | Estimated Timeframe for Completion (as described in OMP) | Actions / Comments (from 01 July 2021 – 30 June 2022) |
|------------------|---|--|--|
| Photo monitoring | <p>To be undertaken as part of the Box–Gum Woodland monitoring.</p> <p>Photo monitoring points will be established in the Offset Area, co-located with the vegetation monitoring plots. These points will assist to assess change over time and will help to determine the effectiveness of active management of interventions such as gully erosion control, weed control, regeneration and revegetation (if appropriate).</p> | 2016 (complete), 2018 (complete), 2019 (completed), 2020 (completed), 2023, 2026, 2029, and 2032 | <ul style="list-style-type: none"> • 2021 methods: total count of population. <p>This was undertaken as part of the Box–Gum Woodland monitoring, with 2016 and 2018 complete. It will be completed again as part of woodland attribute surveys in 2023. Standard photo-points were undertaken in 2018, 2019, 2020 and 2021, and will continue annually as part of the understorey vegetation monitoring. On site there are 15 photo monitoring points associated with vegetation monitoring plots.</p> |
| Staffing | To deliver the actions outlined in this plan, resources have been secured to support a part-time (approx. 0.3 FTE) Senior Ranger (Ranger Grade 3) position and vehicle. | On-going | A permanent Senior Ranger Grade 3 (R3) officer was recruited to deliver the actions of this plan on 1 October 2015. JRHP offset is one of multiple offset areas managed by the ranger and expenditure on salary is weighted accordingly. |
| Training | All personnel, including contractors, involved in managing the offset site must be trained in the requirements and appropriate management of Box–Gum Woodlands. | As needed | Training conducted as needed. |

4. Other Actions

Below are other actions that have been undertaken in relation to the site, as well as notable results.

| Activity | Description | Actions / Comments |
|-------------|---|--|
| Restoration | Eucalyptus blakelyi dieback management | Soil testing and tree assessments for Eucalyptus blakelyi dieback management were conducted in previous years. An ecological burn planned for 2020-21 has been delayed for the last two reporting years due to inappropriate site conditions (wet weather) alongside covid restrictions. Future burns will be considered as necessary. |
| Monitoring | Annual woodland bird monitoring following the methods outlined in the 2018/19 and 2019/20 Annual Monitoring Reports | Woodland birds are being monitored by suitably qualified in-house ecologists as part the woodland bird monitoring program. This monitoring is consistently undertaken seasonally (every three months, four times a year), and was completed in 2018, 2019, 2020, with 3-year baseline data collection completed in Winter 2021. Future survey intervals are to be decided, with 3 or 5 yearly survey intervals likely. |
