The Director General, EDP

Re: Materials Recovery Facility, Fyshwick – letter of support

Dear Sir,

I wish to record my support for this project. I have business in Lithgow Street Fyshwick. I note that a small number of very vocal people are objecting to it on the grounds of traffic problems. They clearly do not know what they are talking about. My trucks use Wiluna and Lithgow streets dozens of times every day and I do not see a problem with congestion.

All too often in this town good ideas are shouted down by a small number of very noisy critics who don't have genuine objections and clearly will not be impacted. The CRS proposal will promote recycling and improvements in waste management. How can we not want these things, especially when it is a privately funded proposal on private land. The government should support this project.

Regards
