---

As an Old Narrabundah resident I wish to express my concerns in relation to the proposed Fyshwick Material Waste Facility on the following grounds:

- The noxious odours and emissions the facility will produce together with those produced by the trucks transporting the waste
- The noise pollution the trucks will provide
- The inevitable traffic snarls which will be created in an already congested area
- The proven risk that such a facility is a fire hazard adding to the health and pollution dangers
- The doubtful recycling targets
- There is already an adequate recycling operation in Mugga Lane
- The jeopardy this will place on further residential planning in the area and the viability of businesses already there.

Recently I attended a community meeting where representatives from CRS gave a very slick presentation in which they agreed not to include an incinerator in their proposal. I gather this has not been completely abandoned.

I sincerely hope due consideration will be given to my concerns.
