Subject: Support for the Proposed Fyshwick Waste Facility
Date: Sunday, 24 June 2018 8:37:47 PM

I just wanted to send a short email to register my support for the proposed waste facility at Fyshwick. The proposal indicates that the facility will use best practice technology to maximise recycling and minimise waste to landfill while producing energy with very little waste. That seems like a very good solution to me, and I am disappointed with apparent local efforts to block approval for this facility, which strike me as the essence of NIMBYism. While I would be concerned if a facility like this was to be built in the heart of a residential suburb I believe that Fyshwick, as a commercial/industrial suburb, is the perfect place for such a facility.

Regards,
