Dear Sir/Madam

Re: Draft Environment Impact Statement Material Recovery Facility Fyshwick, Sect 8 Blk 9 & 11

I wish to record my strong opposition to the proposed was recycling facility being proposed for Section 8, Blocks 9 and 11, Fyshwick.

The proposed use of the site is not compatible with the surrounding businesses. It would be a planning mistake to place such a facility -- with its resultant environmental impact, especially with respect to noise and truck movements -- in a zone so close to built-up commercial and residential areas. Fyshwick is evolving as Canberra grows and such a facility is not a suitable use of the site.

I own and operate a business nearby and would be grateful if you would take my views into account.

Regards
