Subject: Fyshwick waste transfer facility

Categories: Green Category

I object to this development.

Reasons are

Increase in traffic. Fyshwick streets are already overburdened with traffic and adding rubbish trucks to Ipswich Street will make a bad situation worse.

The smell from rubbish trucks entering and leaving as well as from the facility itself will be disgusting. It will greatly impact the businesses around the facility.

Noise from the trucks and the facility will be an unfair impost on the businesses and homes in the area.

Contaminated waste. It is not clear what will happen to contaminated waste. The proponents need to elaborate on this.

Air quality. The activities of the waste facility will add to particulate matter. Trucks will also cause a deterioration in air quality.

This facility will have a detrimental effect on businesses and surrounding homes and it must not be allowed.
