I have just become aware of this proposal and have to say I am hard pressed to think of a stupider location. I agree with the concept of said proposal but find the proposed location ludicrous. It should be in Hume near the tip and close to a multi lane road. Not in a busy suburb and next to an already overburdened set of traffic lights. To say that there will be traffic at night is preposterous. Garbage trucks can't start until 0700 to the best of my knowledge.

Utterly amazed you would even consider it.
