

Submission Against

**Draft Environmental Impact Statement Materials Recovery Facility Fyshwick,
Section 8, Blocks 9 & 11**

Capital Recycling Solutions Application Number 201700053

[To: EPDCustomerServices@act.gov.au](mailto:EPDCustomerServices@act.gov.au)

Dear Members,

As a long term resident of Canberra I am immensely concerned about and oppose the proposed waste recycling facility being located on **Section 8, Blocks 9 & 11 Fyshwick.**

My objection is based on the impact such a facility will have on

1. the population, both residential and working, through the health effects, known and unknown and short and long term resulting consequences.
2. The immense disruption and negative effects on the environment and business, not only in Fyshwick but in the current surrounding and planned future residential and business development.
3. 300,000 tonnes of waste per year, transported via 230 or more trucks per day into the middle of a residential and business area cannot be supported with any valid rational and logical argument when there are so many sites as alternatives that minimize the effects of such an operation.
4. The waste terminal site is in an IZ2 area which prohibits rail use at Block 11 Section 8, the Territory land.

I strongly object to this development and request that the application be rejected.

Yours sincerely
