Survey Work

In March 2017, the ACT Government announced that part Block 29 Section 36 in Mawson is suitable for the development of replacement public housing. Following an extended period of community consultation which refined the proposed design, a Development Application has been lodged by the Public Housing Renewal Taskforce.

More information about this process, including discussions about a range of issues relating to the site, is available at [www.act.gov.au/housingrenewal](http://www.act.gov.au/housingrenewal).

What is happening?

The Taskforce is undertaking further studies of the site as part of preparing for a subsequent Development Application process for associated off site works, including street trees and footpaths. Engineers have been engaged to undertake field work.

This field work will include test pits dug by a hydro-excavation truck (see locations marked as red points within the indicative map below). These test pits will be filled in after soil testing is completed. During field work, appropriate safety measures will be in place to protect workers and passing pedestrians. Workers may be on site between Tuesday 23 January and Wednesday 31 January 2018, weather permitting.
