Draft Environmental Impact Statement, Materials Recovery Facility Fyshwick, Section 8,
Blocks 9 & 11
Capital Recycling Solutions
Application Number 201700053

I strongly oppose approval of the materials recovery facility being located on blocks 9 & 11 section 8 Fyshwick.

Why a waste facility would be allowed as its centre piece is beyond comprehension. The central site is totally incompatible with Fyshwick's character and quite contrary to the more civilised plans for its future.

On so many levels (traffic, health risks, vermin, odour, noise, fire risk etc) the location of the waste recovery plant will compromise the prosperity of Fyshwick and seriously detract from its general amenity and that of the surrounding neighbourhood.

There must surely be other more suitable locations (eg Mitchel) where the effects of an operation of the kind proposed would not be as destructive. For all the benefits which I believe a proposal of this kind would have, I urge you to seriously consider alternative sites that would give both the business model and the future of Fyshwick a better chance of survival.
