Categories: Green Category

Hello

I grew up in Narrabundah - just the other side of the overpass on Canberra Avenue from Fyshwick. I knew how environmentally unsound some of the businesses were in Fyshwick growing up.

I like the way Fyshwick has been evolving into a cleaner business area. There are areas further south east - still on the railway line past the Brand Depot type facility which would suit this type of Materials Recovery Facility? Out Harmon way? It isn't suitable in the midst of where a high volume of people are coming and going or working - it should be located in a more remote type area where if there was an accident then there would be less impact on lives or on nearby workers' health.

Draft Environmental Impact Statement, Materials Recovery Facility Fyshwick, Section 8, Blocks 9 & 11

Capital Recycling Solutions

Application Number 201700053

Thank you for your time.

Cheers
