---

A Waste Facility in Fyshwick is a very bad idea for the following reasons:

- Extra trucks daily adding to traffic congestion.
- Extreme odours spread to nearby residents and businesses, particularly the market, and particularly in hot weather and by wind.
- Dubious future - the vision maybe to process other states' waste, no longer being shipped overseas.
- Ugliness
- Noise - what processing plants are envisaged?
- Smoke from burning-off affecting people and the airport
