Submission opposing the MRF at Fyshwick

Email: EPDCustomerServices@act.gov.au

We wish to object to the Fyshwick Material Waste Facility (MRF) proposal by responding to the Environmental Impact Statement (EIS).

As Narrabundah residents there are several major reasons of concern including fire risk, noise from the operations, increased traffic, potential odour and risks to public health.

In particular, the siting of such a major potential industry to nearby Narrabundah residents, causing increased traffic and noise from the operation of the facility is unacceptable.

The potential pollution of siting such a facility near a residential area such as Narrabundah, which includes child care facilities and schools, does not appear to have been taken into account.
