The Director, EDP

I wish to express my support for this project. I have been to three community meetings where the proponents have made presentations, along with their critics. There has not been enough discussion about alternative ideas, and so if there are none I think the proposal should be allowed to proceed. Continuing with our current waste practices is unacceptable. I do not support the idea of an incinerator but I believe the proponent has genuinely removed that element. The ACT Government's waste to energy policy should rule it out permanently.

Regards
