Hello

I write to you to object about the proposed creation of a waste disposal facility in Fyshwick..

It is quite obviously irresponsible to create such a dirty activity so close to housing, businesses, shops and the city centre. Regardless of how well managed the facility is, there is always the possibility of accidental spills, and other incidents, as can be seen on the roads approaching the Mugga Lane facility. Also the proposed location is in a high traffic area, meaning we will be adversely impacted by the additional damage and maintenance to the surrounding roads.

There is so much more land available in the ACT (possibly even cheaper land) that I do not understand what is the necessity for locating the facility in Fyshwick.

Regards
