Subject: Proposed waste facility in Fyshwick
Date: Sunday, 17 June 2018 7:28:29 PM

Dear Sir/Madam,

I have found reading about the proposed waste management facility proposed for Fyshwick to be more than upsetting.

First, why would any self respecting community want to have a waste management facility in their midst? Odiferous and ugly are just two adjectives that come to mind. Then there is the inevitable spread of escaping rubbish, the drift into urban areas (including to local schools) of plumes of pollution and the road congestion created by high volume truck movements to the facility.

Secondly, there is my concern that a privately run waste facility operating with a profit motive would work against Canberra becoming a waste free city in the foreseeable future.

Thirdly, the proposed 'waste corridor' would impact significantly upon one of the two major entry roads into the Parliamentary area from interstate.

All very depressing, particularly when viewed alongside the vandalism on Northbourne Avenue for establishment of an unnecessary light rail network. Canberra 'the planned garden city' is disappearing before our eyes.

Sincerely
