Subject: Protest.....Re: Proposed Fyshwick waste facility - location is inappropriate, potentially harmful.
Date: Monday, 18 June 2018 11:56:14 AM

To whom it may concern

I would like to add my voice to strongly support those already protesting against the Proposed waste facility being located in Fyshwick.

This proposal needs serious rethinking given the many unavoidable negative impacts that this facility will impose on the physical environment and importantly the Canberra communities and businesses that live near it. Mitigating these negatives must be an imperative if this facility is to achieve the gains it desires. Moving it further away from the populated suburbs of south Canberra is essential for its success, as much as for the health of the Canberra population.

As noted in the public forum 31st May, "The proposed waste transfer station, just off Ipswich Street in Fyshwick, would impact residents of the inner south, and busy Fyshwick shops, market and businesses...." ***Offensive odour from putrescible waste is likely to affect shoppers at the Harvey Norman store, the Fyshwick markets, and people living in Narrabundah and the planned Eastlake development. The addition of 230 trucks a day dumping waste in Fyshwick will significantly increase existing traffic congestion along Ipswich Street and along Canberra Avenue.***"

Your sincerely
