MOLONGLO 132KV TRANSMISSION LINES RELOCATI

Project description *

The 'Overall Project' includes the relocation of existing overhead 132kV transmission lines in Molonglo in ACT. The existing transmission lines are currently located within the Molonglo Stage 3 Future Urban Area (hereafter referred to as Molonglo Stage 3), proposed for residential development over the next 25 years (Umwelt, 2017). The new transmission lines will be located on a different alignment to the existing overhead lines, which is more conducive to the future development of Molonglo Stage 3. The existing transmission lines are above ground, supported by steel towers. The new transmission lines will consist entirely of underground cabling. Connection to the existing overhead transmission lines (to be retained) will occur at two Overhead to Underground (UGOH) sites, one to the east of Kama Nature Reserve (within Molonglo Stage 3), the other one at the south-eastern end of the alignment (at Tuggeranong Parkway). For the purposes of this exemption application, the Project Area includes the portions of the alignments that are located within Territory Land, outside of the existing Molonglo Stage 3 FUA. The Project Area, as assessed in this application, includes the maximum extent of works (approximately 1050m in length). This footprint has been defined to be larger than that required for the works so that all surrounding environmental values are captured in the assessment and any minor changes to the alignment during detailed design are also captured.
